PIELLE ALUMINUM SYSTEMS

ABOUT US

We are a Team with international experiences: our knowledge is daily applied to allow for quick engineering and resolutions of complex architectural design challenges.

VISION

Our company's goal is to share customised solutions, supporting our customers challenges in a day-by-day more complex and competitive global market.

Each project is the synthesis of careful planning, obsessive attention to details and continuous research for new technologies to realize a cutting-edge product.

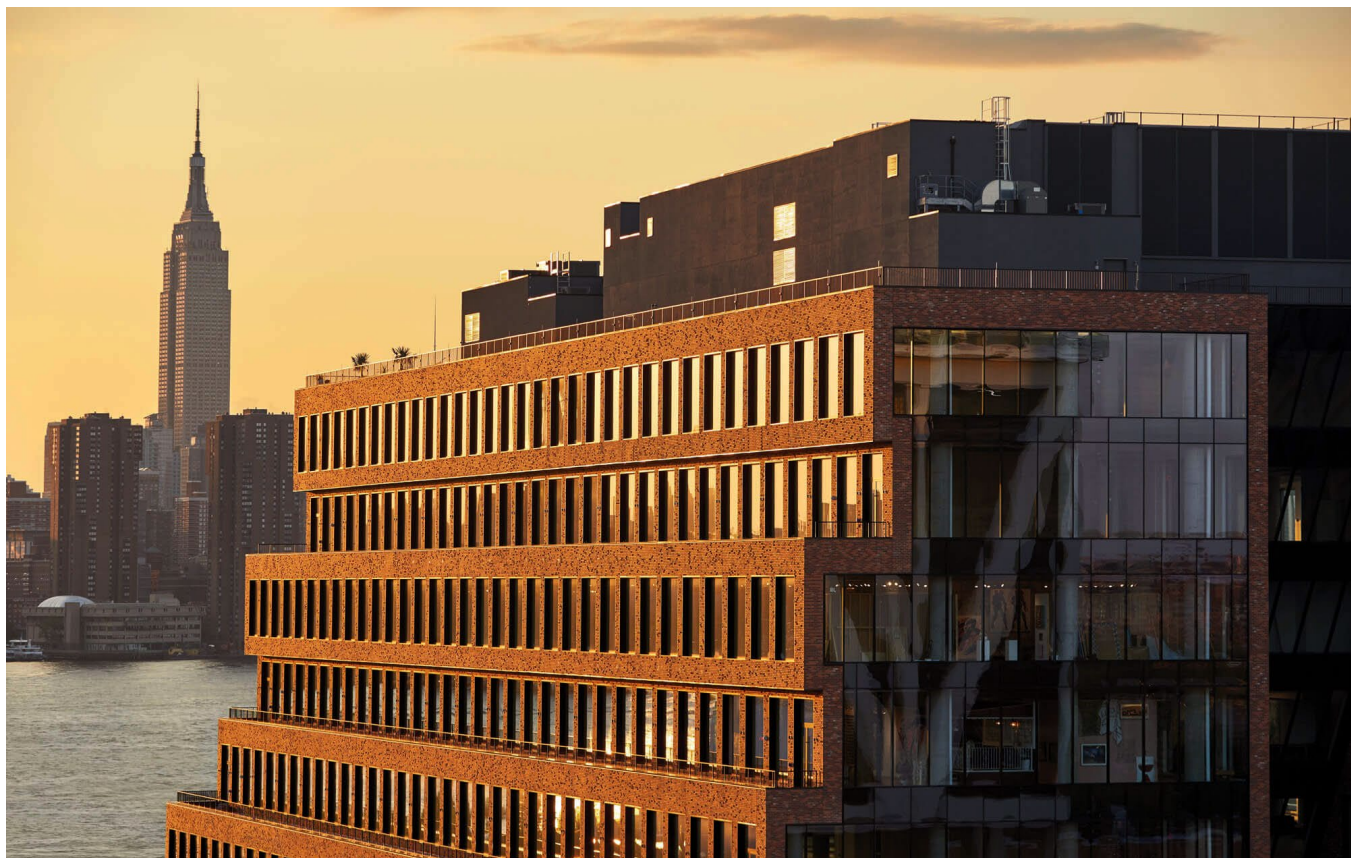

In the respect of the culture, traditions, and the environment of the Countries where and which the company is operative.

TECHNOLOGY

High technology digital machines and cutting lines, give us the best manufacturing performance to satisfy all the customer requirements and needs.

QUALITY

Internal QC that includes, but not only, acoustic, air permeability, water penetration resistant and wind resistance tests, combined by international laboratories consultancy, complete our service that invests in the present to improve the future.
